

# FIRST AID

## AED (Defibrillator) and CPR

This AED (Defibrillator) and CPR training course is a very practical programme that enables delegates to use an Automated External Defibrillator competently and with confidence. The AED (Defibrillator) and CPR training course also includes vital training in resuscitation and choking procedures.

### Programme/Course Content

A range of subjects is covered including:

- Responsibilities and reporting
- Assessment of the situation
- Dealing with an unresponsive casualty
- Resuscitation
- Choking
- Heart attacks
- AED safety
- AED functions
- Defibrillation procedure
- Paediatric defibrillation
- Infection control

**Aimed at:** Each of our courses can be tailored to meet your team's requirements, whether introductory, intermediate or advanced. We can design the ideal solution to accommodate your team's ability, knowledge, practical experience and previous training.

**Accreditation:** OFQUAL Level 2 Award in Basic Life Support and AED (QCF)

**Further information:** The Course Instructor is responsible for determining whether delegates pass or fail based on practical and oral assessment throughout the course, as well as the completion of a multiple choice question paper at the end of the course.

The Instructor will only award a pass if he/she believes that delegates have displayed the requisite understanding and competencies at the end of each session and successfully completes the question paper.

A three year qualification will be issued to the delegate, subject to the assessment.

Please get in touch with our team today for more information about this, or any of our courses.
