

Dementia Awareness

The Dementia Awareness Training Course has been developed to help delegates deliver the highest possible standards of care for patients and service providers using a very specific set of skills and a deep understanding of the debilitating and distressing condition.

Programme/Course Content:

- Dementia defined
- Early signs and symptoms
- Risk factors
- Challenging behaviour
- Memory loss and loss of inhibitions
- Importance of stimulation / sensation
- Wandering
- Sensory loss
- Treatment
- Working with those with Dementia
- Summary and evaluation

Aimed at: Each of our courses can be tailored to meet your team's requirements, whether introductory, intermediate or advanced. We can design the ideal solution to accommodate your team's ability, knowledge, practical experience and previous training.

Accreditation: For delegates looking to further enhance their understanding and competencies, we also offer a nationally accredited qualification entitled the Level 2 Award in Dementia Awareness QCF or the Level 2 Award in Dementia Care. Please get in touch with the team to discuss your specific needs and the level of training required.

Accreditation Available

For distance learning course options or additional accreditation, please consider the following course (s):

Level 2 Award in Awareness of Dementia (QCF)

Level 2 Certificate in the Principles of Dementia Care (QCF)

Further information: We craft our courses and tailor our teachings in accordance with the specific needs of each business or delegate that comes our way – give our team a call today to discuss the ideal solution for your training and development needs.
