

## CLINICAL SKILLS & MANAGEMENT

### Observation Skills of Healthcare Workers

Upon completion of the Observation Skills of Healthcare Workers training course, delegates will have the skills to produce professional, accurate, universally legible reports in accordance with strict UK regulatory guidelines and apply their new observation skills.

#### Programme/Course Content

- What is an observation
- Why are observations important
- How to observe
- Analysing behaviour
- Developing patterns
- Record keeping and reporting
- Summary and evaluation

**Aimed at:** Each of our courses can be tailored to meet your team's requirements, whether introductory, intermediate or advanced. We can design the ideal solution to accommodate your team's ability, knowledge, practical experience and previous training.

**Accreditation:** Compliant with the National Occupation Standards for Health and Social Care Workers and satisfies the requirements of the Care Quality Commission

**Further information:** Contact us for bookings or further information on this or any of our training courses.
