

CLINICAL SKILLS & MANAGEMENT

Tracheostomy Care Training

This Tracheostomy Care training course is developed to give health care and support workers the understanding, knowledge and clinical skill to confidentially, safely and competently perform Tracheostomy Care.

Programme/Course Content

- Evidenced Based Tracheostomy Care Guidelines
- Current Evidenced Based Practice and Research
- Types of Tracheostomy Tubes
- The importance of Effective Communication to Alleviate Panic and Distress
- Clinical Tracheostomy Care and Practice Risk assessment
- Nursing and Tracheostomy Care Considerations
- Removal of Tracheostomy Tube
- Tracheostomy Care (including changing dressings, suctioning and the Tracheostomy Care Plan)
- Tracheostomy Resuscitation
- Tracheostomy Humidification
- Managing Tracheostomy care Emergencies
- Assessment & Certification

Aimed at: Nurses and support staff.

Accreditation: OFQUAL Level 3 Award in Clinical Skills (Tracheostomy Care) (QCF)

Further information: A Guardian Angels Certificate is issued on completion of this Tracheostomy Care training course. Included within all our clinical skills training courses is a comprehensive practical competency package that allows for competency to be demonstrated.

It is therefore recommended that care providers use our Tracheostomy Care competency template so that competency can be achieved within the workplace and a Tracheostomy Care competency certificate can be awarded. Practical competency must be achieved within the workplace within six months of attending our Tracheostomy Care training course.

Should you require optional QCF accreditation is available – Guardian Angels Training is one of a few UK training providers to be approved and accredited to offer the nationally recognised Level 3 Award in Clinical Skills: Tracheostomy Care QCF.
